

With the introduction of the Iridium IX spark plug, NGK, the world's leading manufacturer of spark plugs, made a quantum leap in spark plug technology.

Iridium is a precious metal that is renowned for being harder than most other precious metals and therefore more durable. As a result it is more resistant to chemical corrosion and has a very high melting point of 2450°C.

For those who want the very best performance from their bikes, be it on the road or track, NGK Iridium IX is the natural choice.

IRIDIUM IX

Techie Tim says "Never settle for second best, always insist on NGK, the world's No.1 OE fitment."

Enhanced Ignition Efficiency

Better Acceleration

Faster Starting & Smoother Running

Longer Life

Better Fuel Consumption

The fine wire Iridium tip, laser welded to the centre electrode, has a diameter of only 0.6mm giving outstanding ignitability whilst maintaining the service life of the spark plug.

0.6mm Iridium tip

Enhanced Ignition Efficiency

The small diameter Iridium tip focuses the electrical energy around the centre electrode, resulting in more efficient ignition.

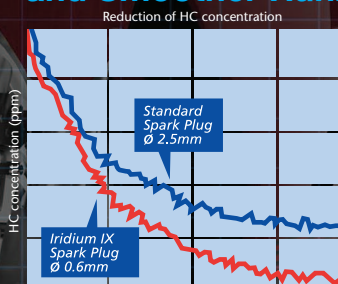

Better Acceleration

Reduction of 0.7 seconds in time to accelerate from 20 to 60 mph.

Tested engine: 1500cc, 3rd gear fixed

Faster Starting and Smoother Running

With the high ignitability of the NGK Iridium IX Spark Plug, your engine will start up quickly and run smoothly even on cold and damp mornings.

This results in reduced hydrocarbon emissions.

Longer Life

The 0.6mm Iridium electrode gives continuous reliability over a long period. The NGK Iridium IX Spark Plug combines high ignitability

Better Fuel Consumption

Tested plug	10 - 15 mode fuel efficiency (mpg)
Iridium IX Spark Plug Ø 0.6mm	42.4
Standard Spark Plug Ø 2.5mm	41.7

The excellent ignitability of NGK Iridium IX Spark Plugs gives very high combustion efficiency, resulting in more miles per gallon.
